I feel that this service is very important to the truck driver. We travel in and out of cities all the time and don't have the luxury of waiting on 20 minutes of commercials for local information that we need right away to avoid traffic accidents and bad weather. If this service is denied us we cannot do our jobs as effieciently. We pay for this service and we feel that we should have access to everything we pay for. We do not need someone to legislate everything we do and what we do or do not listen to. We are adults and we like to make our own decisions. Please reject the NAB's petition 04-160 and support XM's right to provide the programming that we are demanding. Thank you so much for your time and support.
